Yuhui Zhang — Resume

Yuhui Zhang

Senior Full-Stack & AI/LLM Engineer — Beijing, China • Remote (GMT+8)

cmdbird@163.com • https://aidooo.com • https://github.com/zhgyuhuii

Summary

Senior full-stack engineer with 19 years of experience building and shipping production software end to end — requirements, architecture, backend, frontend, and deployment, often single-handedly. For the past two years focused on AI/LLM engineering, including a complete enterprise AI assistant platform with RAG, multimodal generation, Text2SQL, and a unified local-plus-cloud model gateway. Deep background in Java/Spring Cloud microservices and modern TypeScript/React/Vue/Electron/Tauri stacks. Works remotely and async; communicates in clear written English.

Skills

- AI and LLM: RAG, multimodal generation (text-to-image, text-to-video, digital human, TTS, ASR), Text2SQL, LLM gateway (local llama.cpp and whisper plus 170+ cloud models), vector databases (Milvus), prompt engineering
- Backend: Python, FastAPI, Java, Spring Cloud, Spring Boot, microservices (Nacos, Seata, RocketMQ), Node.js, REST and WebSocket
- Frontend: TypeScript, JavaScript, React, Vue 2 and 3, Vite, Ant Design, Element UI, React Native
- Desktop and Cross-platform: Electron, Tauri, WPF, WinForm, C#, C and C++
- Data and Infrastructure: PostgreSQL, MySQL, Redis, Elasticsearch, Milvus, MinIO, SQLite, Docker, Linux, CI/CD

Employment History

Senior Full-Stack & AI Engineer

Beijing Tongyu Zhicheng Technology | 02/2024 – Present

Architect and build Chayuan, an enterprise AI assistant platform that unifies RAG over five knowledge-source types (documents, SQL, vector, office, image), Text2SQL, multimodal generation (image, video, digital human, voice), and a unified model gateway running local inference plus 170+ cloud models, with multi-tenant access control and Docker deployment. Stack: Python, FastAPI, React, TypeScript, Vue, Tauri, PostgreSQL, Milvus, Redis. Own the full lifecycle from architecture to deployment.

Full-Stack Engineer

Zhongdian Zhiyuan Data Technology | 08/2023 – 02/2024

Built enterprise products end to end (Electron and Vue front end, Spring Boot back end): gathered requirements, selected the tech stack, and developed front end, back end, and data models from scratch; delivered a stable production release.

Full-Stack Engineer

Beijing Yunshengda Technology | 03/2020 – 02/2023

Led architecture and full-stack development of cloud-native platforms, including an O2O commerce platform and a smart-agriculture super-app built single-handedly, using Spring Cloud microservices (Nacos, Seata, RocketMQ), Vue, Elasticsearch, Redis, and MySQL. Also delivered cross-platform mobile applications.

Full-Stack Engineer

Beijing Jinmawei Software | 10/2011 – 03/2020

Requirements analysis, architecture design, and core development of lifecycle project-management and audit systems spanning web, PC, Android, and iOS, delivered to government and university clients. Also built a high-concurrency national language-proficiency exam system supporting thousands of concurrent users, a large-scale face-recognition system for a public-security agency, and an Office-based automated contract-review tool.

Software Engineer (Desktop)

Beijing Huatie Jiecheng Technology | 03/2008 – 10/2011

Requirements analysis, development, and unit testing of C# and .NET WinForm desktop applications for enterprise clients.

Software Engineer (Desktop)

Beijing Yifan Software | 10/2007 – 03/2008

Product requirements analysis, solution design, and development of C# and .NET WinForm desktop software.

Education

Bachelor of Science in Computer Science and Technology

Zhengzhou University | 2003 – 2007
