Yuhui Zhang — Resume

Yuhui Zhang

Senior Full-Stack Engineer • **AI / LLM Application Specialist** Beijing, China (Remote, GMT+8) • cmdbird@163.com • 19 years of experience

Professional Summary

Senior full-stack engineer with **19 years** of hands-on experience taking products **from zero to production** — requirements, architecture, front end, back end, and deployment, often single-handedly. Built **20+ platforms** across enterprise SaaS, e-commerce/O2O, government, and smart agriculture. For the past two years focused on **AI/LLM engineering**: architected a complete enterprise AI assistant platform with **RAG, multimodal generation, Text2SQL, and a unified local+cloud model gateway**. Deep in the **Java/Spring Cloud microservices** ecosystem and modern **TypeScript/React/Vue/Electron/Tauri** stacks; comfortable across web, desktop, and mobile. I deliver complete, reliable systems and communicate directly with clients.

Core Skills

- **AI / LLM**: RAG (multi-source retrieval, rerank, citations), multimodal generation (text-to-image / text-to-video, digital human, TTS/ASR), Text2SQL, LLM gateway (local llama.cpp / whisper + cloud vendors, 170+ models), vector DBs (Milvus), MCP, prompt engineering
- **Backend**: Java, Spring Cloud / Spring Boot / Spring MVC microservices (Nacos, Gateway, Feign, Seata, RocketMQ, XXL-JOB, MyBatis-Plus), Python / FastAPI, Node.js, RESTful & WebSocket
- **Frontend**: TypeScript, JavaScript, React, Vue 2/3, Vite, Ant Design, Element UI, React Native
- **Desktop / Cross-platform**: Electron, Tauri, WPF, WinForm, C#, C/C++, Objective-C; Android / iOS
- **Data & Infra**: PostgreSQL, MySQL, Redis, Elasticsearch, Milvus, MinIO, Dameng (达梦), SQLite; Docker, cloud-native, Linux, CI/CD
- **Strengths**: end-to-end independent delivery • system architecture • high-concurrency • domestic-stack (信创) adaptation • client-facing solutioning
- **Languages / Communication**: Chinese (native); professional **written & technical English** — async / text-first collaboration (chat, email, issues, docs)

Selected Projects

Chayuan — Enterprise AI Assistant Platform • Lead Full-Stack/AI Engineer • 2024–Present End-to-end AI platform unifying document RAG, structured-data Q&A, multimodal generation, and a model gateway in one product. - Architected the full stack: **Python/FastAPI** backend, **React/TypeScript** pnpm monorepo, **Vue** WPS add-in, **Tauri** desktop app. - Built **5 unified knowledge sources** (documents/SQL/vector/office/image) with retrieval orchestration, rerank, and grounded citations; **Text2SQL** with read-only validation across 17 SQL dialects. - Delivered **multimodal** features: text-to-image/video, digital human, TTS & voice cloning, ASR — with a model gateway running **local inference (llama.cpp / whisper)** alongside **170+ cloud models**. - Implemented **RBAC multi-tenant** auth, seat licensing, unified file service, and **Docker** deployment; published images to Docker Hub & Aliyun ACR. **5 repositories, 3700+ commits.** - Shipped **4 product editions** (WPS add-

in, desktop, team/service, enterprise) on one engine; full **domestic-stack** support (Kylin/UOS OS, Dameng/Kingbase DB, LoongArch CPU).

Shanglang Tianwang — Cloud-Native O2O Commerce Platform • Full-Stack Engineer • 2021–2022 O2O platform linking physical stores and e-commerce via WeChat/Alipay/Douyin mini-programs, multi-role supply chain. - Spring Cloud microservices (Nacos2, Gateway, Feign, Seata, RocketMQ, XXL-JOB, MyBatis-Plus-Join), Elasticsearch, MySQL, MinIO.

Yunongba — Smart Agriculture Platform • Full-Stack Engineer (solo build) • 2020–2021 Comprehensive agriculture platform with online diagnosis, expert booking, VR, and big-data supply/demand. - **Single-handedly built the entire platform**: Vue + Spring Cloud (Nacos2), Redis, Elasticsearch, MinIO, MySQL, VR engine (Krpano), Canal, RocketMQ, Seata.

Construction Lifecycle Project Management & Audit System • Engineer • 2014–2020 PMBOK-based full-lifecycle PM & audit across web/PC/Android/iOS/server; 20+ modules (cost, schedule, quality, procurement, risk…). - Delivered for a **national government agency, a defense-sector organization, and top universities**. - Built C#/WPF desktop client with **embedded Chrome** and **FTP resumable upload** for very large attachments.

Earlier highlights: a large-scale face-recognition system for a public-security agency (2014); a **national language-proficiency exam system (HSK)** supporting **thousands of concurrent test-takers** (2013–2014); Office-based contract auto-review via C# Office API (2012); multiple cross-platform mobile apps (React Native).

Experience

Role	Company	Period
Full-Stack / AI Engineer	Beijing Tongyu Zhicheng Technology	2024.02–Present (also 2023.02–2023.08)
Full-Stack Engineer	Zhongdian Zhiyuan Data Technology	2023.08–2024.02
Full-Stack Engineer	Beijing Yunshengda Technology	2020.03–2023.02
Full-Stack Engineer	Beijing Jinmawei Software	2011.10–2020.03
WinForm Engineer	Beijing Huatie Jiecheng Technology	2008.03–2011.10
WinForm Engineer	Beijing Yifan Software	2007.10–2008.03

Education

B.S. in Computer Science & Technology — Zhengzhou University, 2003–2007
